the centre of the picture

#15 Bristles Spring

#16 Hibelocks North branch, or "Assault Swimming place."

#17 Hawthorn's & Thorau's graves - The gravestones in the Thorau lot were originally of red sandstone, but ~~through~~ through the action of the elements began to scale off, and some 8 years ago or so, they were taken away, and the stones in the other picture put in place of them - a great mistake to my way of thinking, - and a photo of Thorau with band under the chin, from daguerre type by Professor of Worcester -

Yours very truly  
Alfred W. Hornum
